

Seating & Positioning Algorithm*

When choosing an intervention for a patient with a wound, or with a history of a wound, the etiology of the wound should be assessed.

Call 866-860-5200 for immediate clinical assistance from a therapist who specializes in seating & positioning.

**This algorithm is meant as a general guide only; it is not a substitute for clinical judgement. Equipment selection should begin with a full patient assessment that includes skin integrity, positioning risks, and functional goals.*
